Casting numbers on the early style carbs is found on the top of the carb just behind the stay plate. It's stamped on a flat oval spot as shown above in the closeup.

Casting numbers on the later 77/78 style carbs is found on the castings just above the float bowl.  
It's stamped on a flat rectangular spot as shown above in the closeup.

Casting numbers on the quad cable pull 69/70 Sandcast style carbs is found on the stayplate, not the castings.  
Thanks to Oldhemi for the info!
